5 Why Choose Cybergrid?

CYBERGRID

About Us.

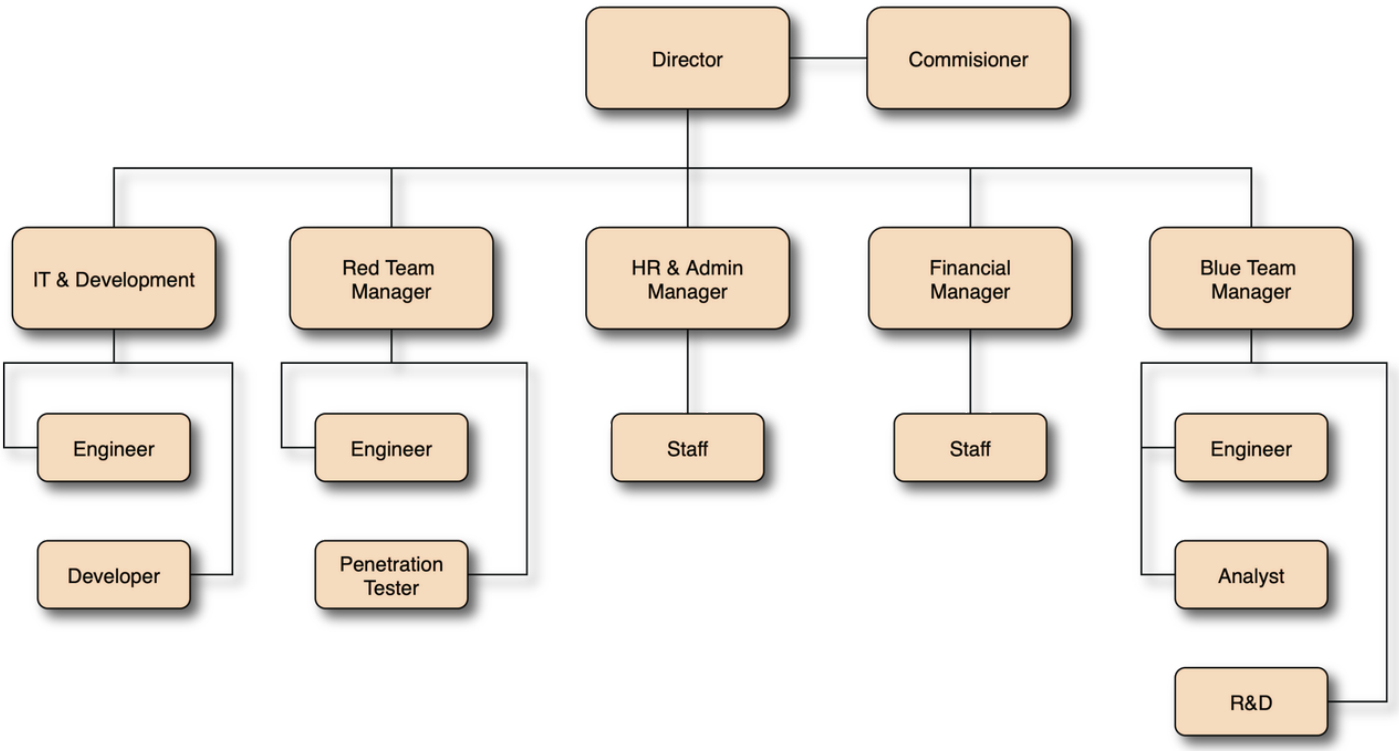

Introduction

CyberGrid is a next-generation cybersecurity and IT solutions provider, founded by a team of passionate young innovators with a vision to reshape the digital security landscape. As a startup built by forward-thinking professionals, we understand the fast-paced evolution of technology and the increasing sophistication of cyber threats. Our mission is to empower businesses with cutting-edge, reliable, and secure IT solutions that not only protect but also enhance their digital infrastructure.

As a startup, we are not just a service provider—we are partners in innovation, growth, and security. By combining our expertise with a deep understanding of modern business needs, we deliver proactive strategies that safeguard sensitive data, optimize operations, and build resilient IT ecosystems. Join us in shaping a safer, smarter digital future.

CYBERGRID

Company Structure

Vision & Mission.

VISION

To be Indonesia's leading provider of IT and cybersecurity solutions, empowering businesses to navigate digital challenges with confidence.

MISSION

- Deliver holistic IT solutions from application development to infrastructure management.
- Protect client data with the latest technologies and compliance-driven strategies.
- Help businesses adapt to technological advancements for better productivity and security.

</> Our Services </>

Complete IT Solution Services:

- End-to-end IT services covering planning, design, implementation, and maintenance to optimize your IT infrastructure.
- Network Infrastructure:
  Custom-designed networks that are secure, efficient, and scalable, including LAN, WAN, and cloud-based networking.
- Surveillance System:
  Advanced monitoring systems with real-time analytics to enhance physical security and asset protection.
- Building Automation:
  Intelligent systems for managing lighting, HVAC, and energy usage to improve efficiency and reduce costs.
- Tailored Application and Web Development:
  Development of secure, scalable, and user-friendly applications tailored to business requirements.

Cybersecurity Services:

- Penetration Testing (Pentesting):
  Simulating cyberattacks to identify vulnerabilities and provide actionable remediation insights.
- Digital Forensic Analysis:
  Investigating security incidents to uncover causes, assess damage, and recommend preventive measures.
- Managed Services:
  Proactive monitoring, maintenance, and management of IT systems to ensure continuous protection.
- Firewall Services:
  Deployment and management of advanced firewall solutions to safeguard against unauthorized access.
- Code Hardening:
  Strengthening application code to reduce vulnerabilities and enhance security resilience.
- Code Analysis:
  Comprehensive audits to identify and address potential security risks in software applications.

Our Clients & Partners

Since our founding, CyberGrid has had the privilege of working with a diverse range of organizations from private enterprises and digital first companies to industry associations and government linked institutions. Our engagements span cybersecurity assessments, managed security operations, web development, and enterprise systems integration.
